Cara, here is the Ecology Fact Sheet summarizing the two Ecology PPA Consent Decrees which EHA intends to execute and under which Asarco will perform work.. We understand that EPA is authorizing a removal action for transportation and disposal of Everett soils at the Asarco Tacoma Smelter.

In summary, EHA is seeking comfort that the Asarco Tacoma Smelter will be available for disposal of Everett soils, as well as further assurance that EPA will not pursue enforcement against EHA at the Asarco Tacoma Smelter for the disposal of such soils.

We would appreciate a written response to this inquiry, which summarizes Joe Delaney's prior oral requests to you and Kevin Rochlin.

Thank you for your consideration

Chuck Wolfe
